### **CHTA's Comment on Cannabinoids, Specifically Cannabidiol (CBD)**

The Canadian Hemp Trade Alliance has been receiving a lot of inquiries and questions related to the potential benefits and sources of various Cannabinoids present in industrial hemp.

The CHTA does not have any information or a response to enquiries related to Cannabinoids, specifically Cannabidiol.

In Canada, the Health Canada regulations allow only licensed producers to harvest the seed and stalk of the hemp plant. It is illegal for licensed producers and processors to harvest, store or utilize all other parts of the hemp plant.

More information can be found at the Government of Canada's site <http://laws-lois.justice.gc.ca/eng/regulations/SOR-98-156/page-1.html> or at Health Canada's site at <http://www.hc-sc.gc.ca/hc-ps/substancontrol/hemp-chanvre/about-apropos/faq/index-eng.php>

The industrial hemp varieties are an excellent source of protein, omegas, digestible fibre and minerals.

Hemp oil, from Canada, is the oil that is derived from the seed of hemp and is for food purposes only.
